

The Vienna Biocenter Core Facilities GmbH (VBCF) offers three

FemTech Internships (full time) at the following facilities:

- **[Plant Sciences](#)**
- **[Bioinformatics & Scientific Computing](#)**
- **[BiImaging Austria - CMI](#)**

Vienna Biocenter Core Facilities GmbH (VBCF) is a non-profit organization providing scientific infrastructure operated, maintained, and developed by highly qualified experts. We are situated at the Vienna Biocenter, which is one of Europe's leading multidisciplinary biomedical research centers. For more information visit our website:

www.vbcf.ac.at

We are looking two motivated candidates for 2 – 6-months fully-funded practical stays to support the operation of the three above mentioned facilities and participate in their research activities.

Your profile:

- You are a female student, currently studying at a university or FHS in the field of Life Sciences or Technology
- Finished at least one complete semester
- Good knowledge of statistics
- A good command of English, spoken and written
- An interest in working at one of the above mentioned facilities with a specific focus on IT aspects, therefore knowledge of programming with R and python are an asset
- For CMI: Students with previous lab experience and expertise in microscopy are specifically encouraged to apply

The company offers a friendly, professional and stimulating environment of a multinational institution. The fellowships are available since June - September 2018, preferably for 6 months at a gross salary of 1.400.- EUR per month.

Applications including a detailed CV and cover letter should be sent by e-mail to:

- jakub.jez@vbcf.ac.at (core facility Plant Sciences)
- attila.gyenesei@vbcf.ac.at (core facility Bioinformatics & Scientific Computing)
- andreas.walter@vbcf.ac.at (BiImaging Austria - CMI)

We are looking forward to receiving your application!
